Each capsule contains:
Thiamine Mononitrate (Vitamin B₁) ……………..300 mg
Pyridoxine Hydrochloride (Vitamin B₆) ……………100 mg
Cyanocobalamin (Vitamin B₁₂) ……………..100 mcg

NEURO-B’s
300 mg Capsule
Neurotropic Vitamins

FORMULATION:
Each capsule contains:
Thiamine Mononitrate (Vitamin B₁)………………………………………..…………………….300 mg
Pyridoxine Hydrochloride (Vitamin B₆)…………………………………………..…………….. 100 mg
Cyanocobalamin (Vitamin B₁₂) ……………………………...…………………………..100 mcg

ACTIONS:
Vitamin B replacement
Vitamin B₁ and B₆ constitute part of an enzyme system in the nerve cell and are necessary for normal function of nerve tissue. They are used in the treatment of neurological disorders associated with nerve cell dysfunction. Vitamin B₁₂ is necessary for the synthesis of nucleic acid in the erythropoiesis and plays an important role in the metabolism of the nerve tissue.

INDICATIONS:
Painful neurological manifestation e.g. neuritis, polyneuritis, neuralgias, lumbago, ischialgia, sciatica, cervical and shoulder-arm syndrome, rheumatic pains. Herpes zoster, encephalopathies. Neuropathies caused by certain diseases states e.g. diabetes and cardiac disorders. Alcoholic neuropathy; iatrogenic complications arising from INH, reserpine and phenothiazine therapy; other drug induced neuropathies. Hyperemesis gravidarum; neuropathic changes during pregnancy.

SIDE EFFECTS:
Vit. B₁ + B₆ + B₁₂ (Neuro-B’s) are completely non-toxic even in high doses and usually, no side effects occur. Sensitivity to Vitamin B₁ may sometimes be encountered. Sensitivity may occur if administration is at prolonged at intervals, is irregular, or if the initial dose is low and is suddenly increased: liver dysfunction also seems to predispose to patients to hypersensitivity reaction. Nevertheless, it must be stressed that the hypersensitivity to vitamin B₁ is very rare when given orally and is encountered more often when given by intravenous injection.

INTERACTIONS:
Vitamin B₆ (pyridoxine hydrochloride) reduces the therapeutic effects of Levodopa.

DOSAGE AND ADMINISTRATION:
For therapeutic use: 2 to 4 capsules daily until acute symptoms subside. Chronic cases may require longer therapy depending on the needs of the patient. For prophylactic administration when disease or drugs are likely to lead neurological complications: 1-2 capsules daily. Or as prescribed by the physician.

CAUTION:
Foods, Drugs, Devices and Cosmetics Act prohibits dispensing without prescription.

AVAILABILITY:
Capsules x 100’s in strip pack of 10’s

STORE AT TEMPERATURES NOT EXCEEDING 30°C

Manufactured for:
PHARMA DYNAMIC
PDI Bldg., 71Maysilo St., Mandaluyong City by:
DRUGMAKER’S LABORATORIES, INC.
E & E Industrial Complex, Brgy. San Antonio,
San Pedro, Laguna
Each tablet contains:
Thiamine Hydrochloride (Vitamin B₁) ………..………500 mg
Pyridoxine Hydrochloride (Vitamin B₆) …………………..250 mg
Cyanocobalamin (Vitamin B₁₂) …………………..………...…1000 mcg

They are used in the treatment of neurological disorders associated with nerve cell dysfunction. Vitamin B₁₂ is necessary for the synthesis of nucleic acid in the erythropoiesis and plays an important role in the metabolism of the nerve tissue.

INDICATIONS:
Neuritis, neuralgias, shoulder-arm syndrome, facial paresis, pregnancy neuritis, drug induced and alcoholic neuropathy.

SPECIAL PRECAUTION:
Vitamin B₆ in high doses is known to weaken the effect of L-dopa.

DOSAGE:
Prophylactic: 1 to 2 tablets daily
Therapeutic: 2 to 4 tablets daily or as prescribed by the physician.

CAUTION:
Foods, Drugs, Devices and Cosmetics Act prohibits dispensing without prescription.
